

## Alcatel Thomson Speedtouch Setup - Bridged Mode

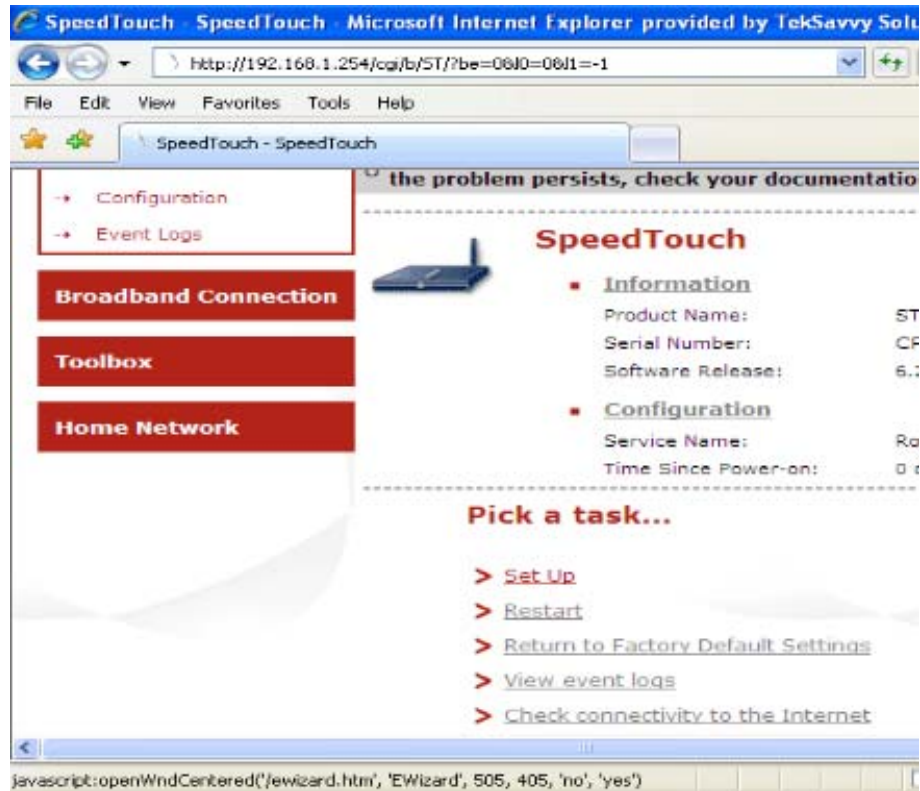

1. Open up your **Web Browser** and type in **192.168.1.254** in the address bar at the top and hit **Enter**. This will open up the Speedtouch home page.

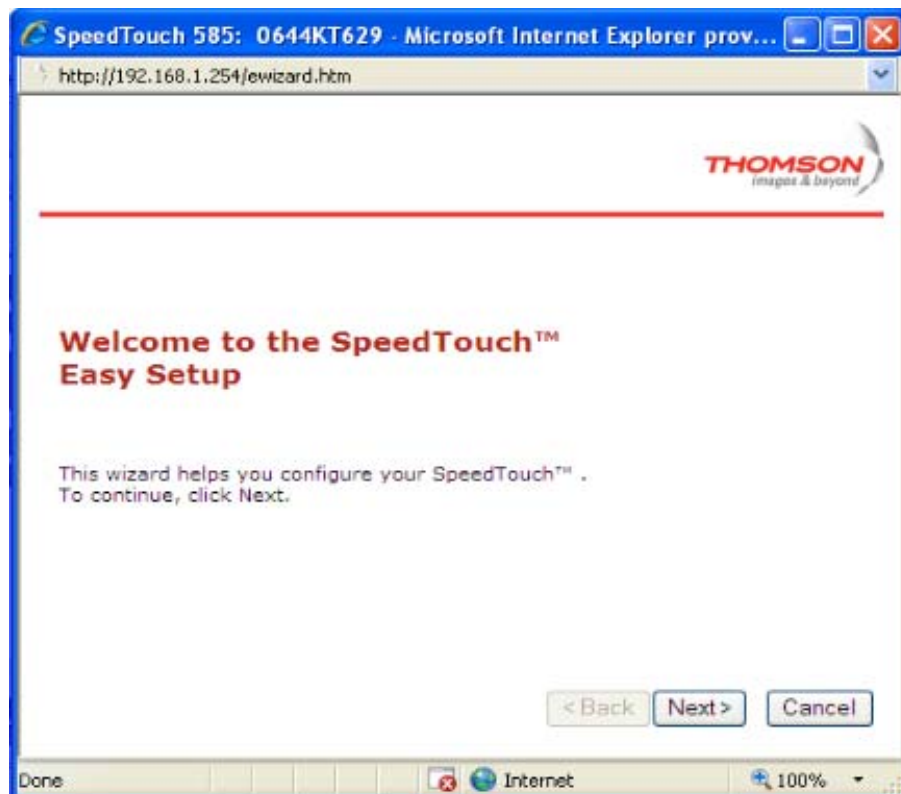

2. Click on the **SpeedTouch** menu on the left

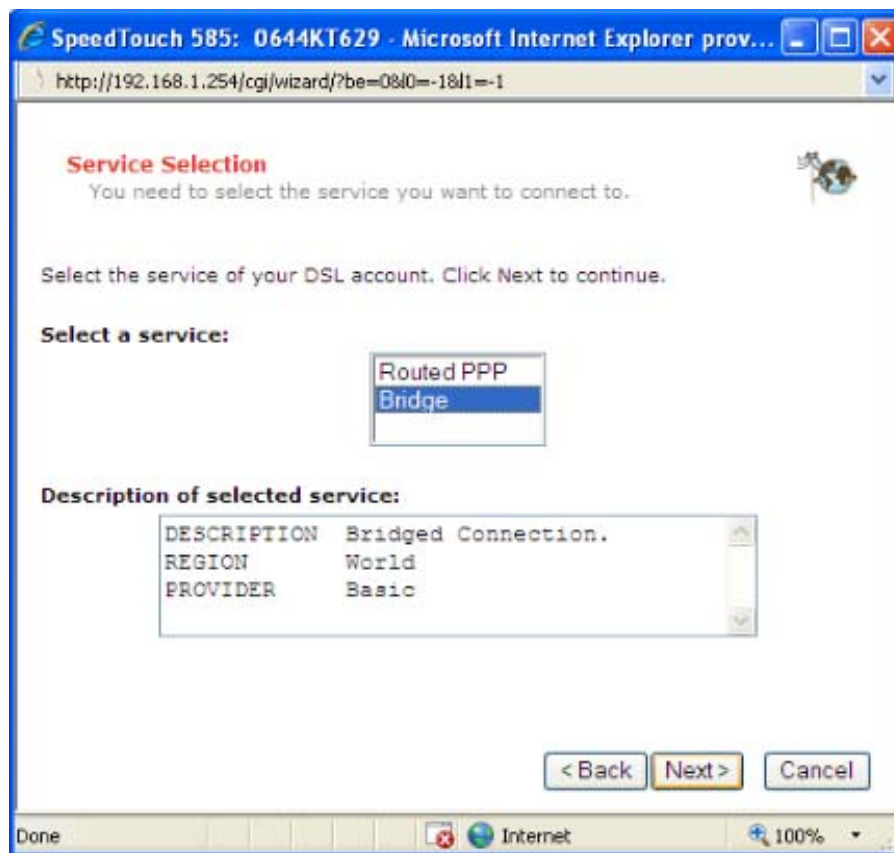

3. **Scroll down** to the bottom of the page and click on the **Set Up** link.

4. A new page will open up. Click **Next**

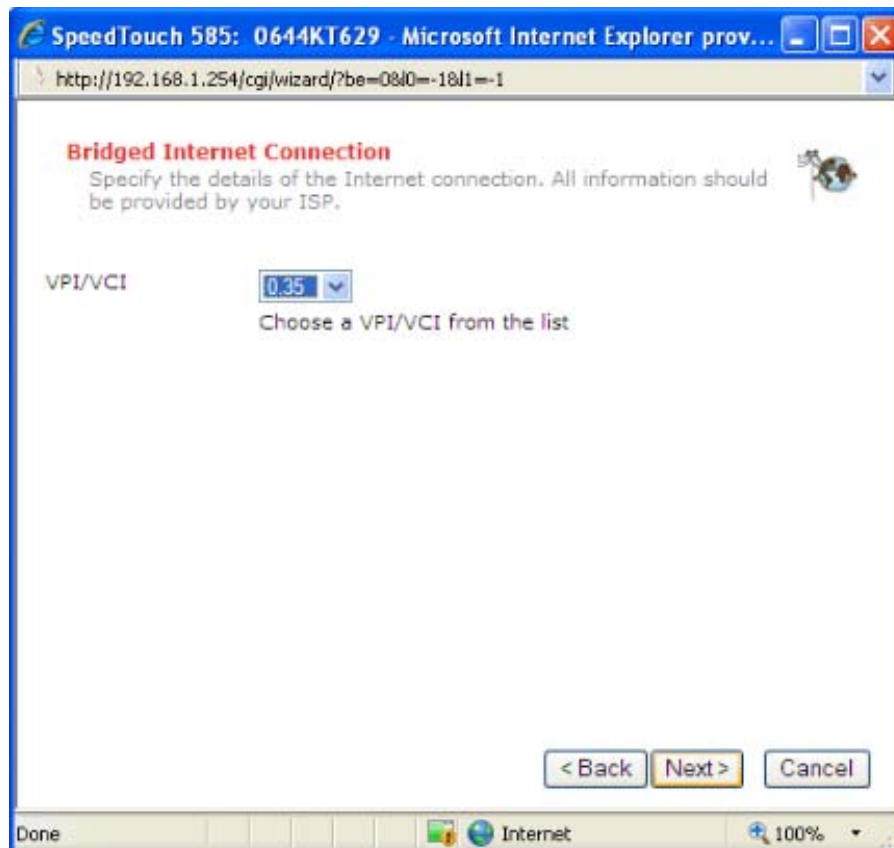

5. Select **Bridge** and click **Next**

6. Make sure that the VPI/VCI is **0.35** and Click **Next**.

**Note:** If your in Alberta or B.C. you need to change this to 0.33

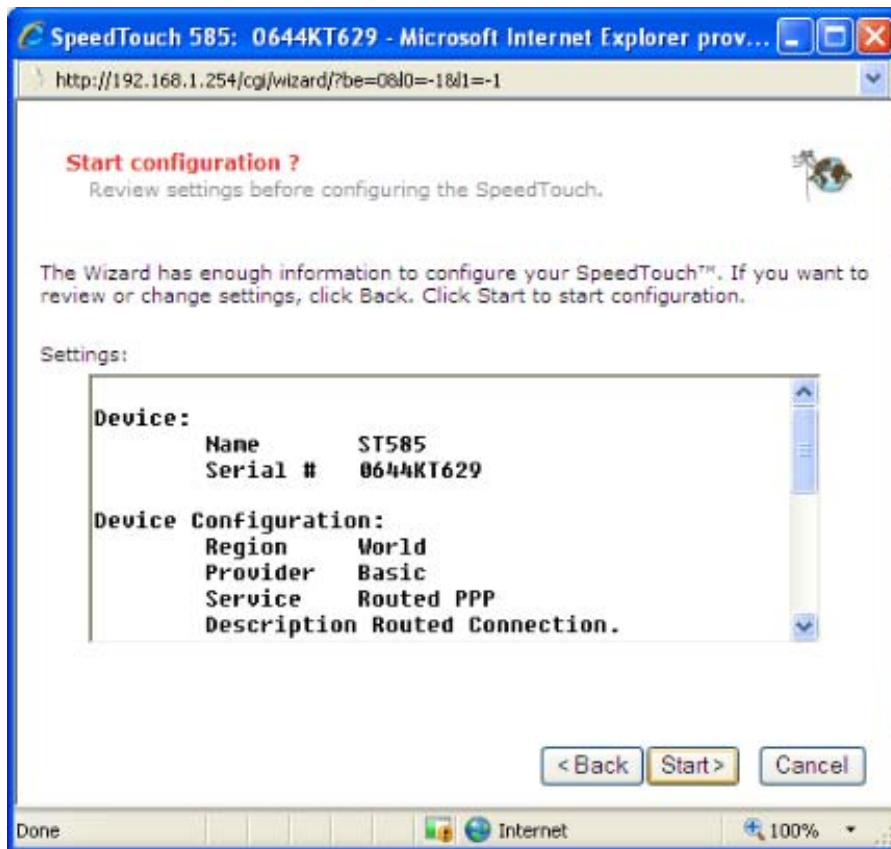

7. You can either enter in a password here or leave it blank and click **Next**

The screenshot shows a web browser window titled "SpeedTouch 585: 0644KT629 - Microsoft Internet Explorer prov...". The address bar shows "http://192.168.1.254/cgi/wizard/?be=0&0=-1&1=-1". The page content is titled "Access Control" and includes the instruction "Specify user name and password to prevent unwanted access to the SpeedTouch management interface." There are three input fields: "User Name" with the text "Administrator", "Password", and "Confirm Password". Below the fields are three buttons: "< Back", "Next >", and "Cancel". The browser status bar at the bottom shows "Done", "Internet", and "100%".

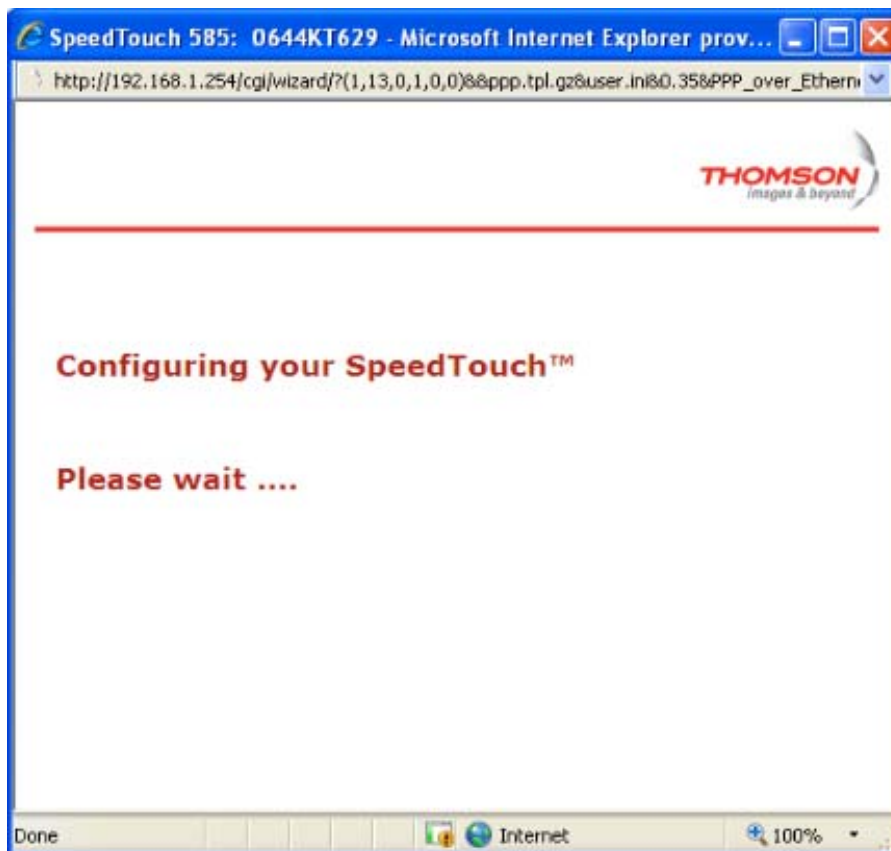

8. If your going to hook your modem to a **Router: Uncheck DHCP Server**  
If your going to hook your modem up **directly to a computer: Keep DHCP Server Checked**  
Click **Next**

The screenshot shows a web browser window titled "SpeedTouch 585: 0644KT629 - Microsoft Internet Explorer prov...". The address bar shows "http://192.168.1.254/cgi/wizard/?be=0&0=-1&1=-1". The page content is titled "LAN Settings" and includes the instruction "Specify the Local Area Network settings." There is a checkbox labeled "DHCP Server" which is checked. Below the checkbox is the text "Start the DHCP server on the SpeedTouch". At the bottom of the page are three buttons: "< Back", "Next >", and "Cancel". The browser status bar at the bottom shows "Done", "Internet", and "100%".

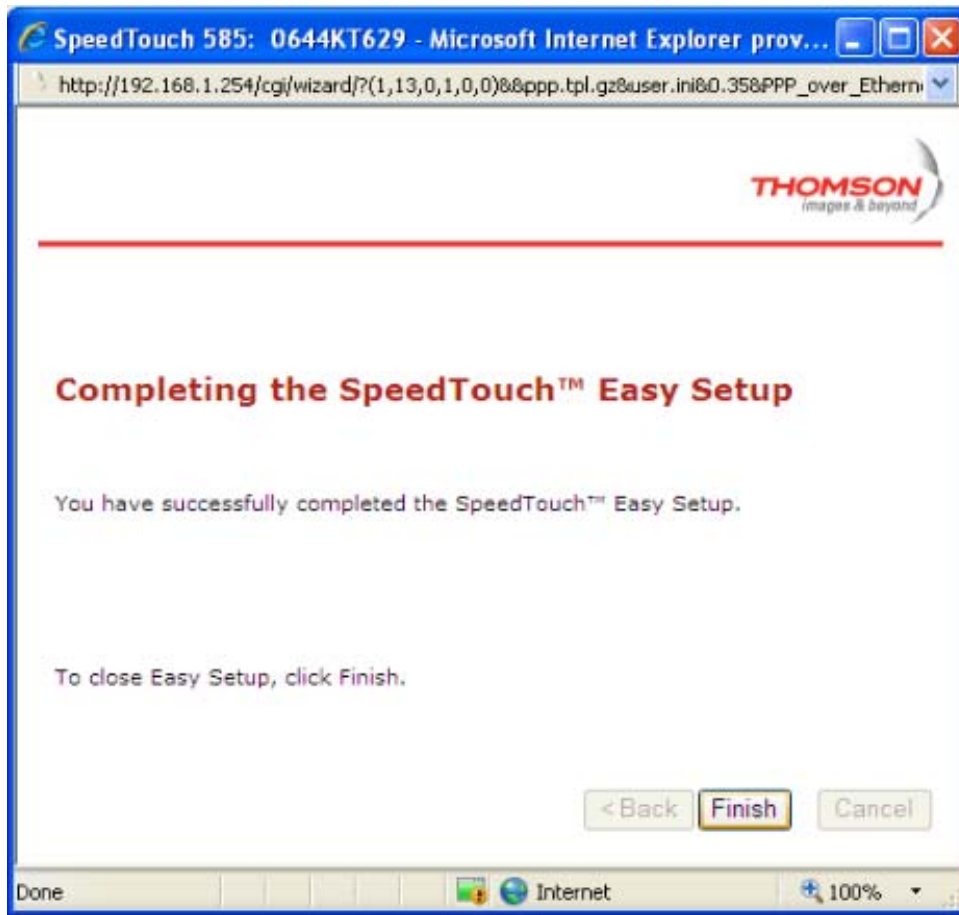

9. Click on **Start**

10. Now we wait...

11. Click on **Finish**

12. We are done! Enjoy high speed.
